Installation & Maintenance of Euroscreen® Electric Screens

- **Never roll the screen down before it has been properly mounted.**
- **The product needs to be mounted horizontally for optimized functionality.**
- **Never set the screen too far down but leave at least one round of screen material on the roll, otherwise it may cause the screen material to detach.**
- **Never leave the screen in down position for long periods, store it rolled up when not in use.**
- **Cleaning of screen surface—We highly recommend Euroscreen® Screen Cleaning Spray for cleaning of screen fabrics. Just spray the fluid onto the unclean area and wipe with a clean cloth. Be sure to wipe off all fluid from the screen surface once cleaned.**
