

Access/Series V—Innovative mounting brackets and case design make the Access versatile and easy to fit in small spaces. Case is 17.8 cm high x 22.9 cm deep (includes flange and mounting brackets). Flange around all four sides of the case supports ceiling tile or serves to trim the ceiling opening— included in case lengths below. Image area fully framed with black; with **30 cm black drop at top of viewing surface (standard)**. U.S. Patent Numbers 6,137,629; 6,421,175; 6,532,109; and 6,816,308; other patents pending. Plenum rated case (UL approved "Suitable for Use in Environmental Air Space."). Includes 3-position switch.

Optional Motors: Quiet Motor (Q), Motor with Built-in Low Voltage Controller (L), or Quiet Motor with Built-in Low Voltage Controller (QL); see page 23.

Optional Controls: MC-1 network controller or VIC Video Interface Control may be built into the case. A variety of switches, listed on page 24, may be installed outside the case. Also available in 15:9 format sizes.

Other Options: Additional drop above image area, see page 24 (black is standard; surface color available). Cineflex rear projection surface, by quotation. Custom sizes available by quotation. Please specify details like extra drop, etc. Also available in 15:9 format sizes.

An Access case may be ordered and installed prior to selecting a screen size, type and format. Please see page 12 for cases.

Extra drop and built-in controls may increase case length: call factory for dimensions. Only one control—MC1 or VIC—can be factory-installed in each case.

Before ordering an Access/Series V screen, please fill out an Access/Ultimate Access Planning Sheet from <http://www.draperinc.com/go/AccessV.htm>

Part numbers in this table followed by "~" denote items which are typically **IN STOCK** and available for immediate shipment.

The Access Series: Case Now, Screen Later...

The Access Series screen offers you a significant benefit: the extruded aluminum case can be installed in the ceiling first and the screen (motor-in-roller with attached viewing surface) can be added later. The potential advantages are threefold—

1. You can install the case during the "dirty" phase of the construction process and keep the screen safe until you install the projector. Screen installs in seconds with patented, preset latching roller brackets and electrical pin connectors. *Eliminates job site damage.*
2. If your customer can't decide what size and type of screen they want, you can order the Access case now and the screen later when your customer has made a decision. Screen mounting brackets are infinitely adjustable in a track in the top of the case to fit various sizes.
3. You don't have to put out as much money on the front end.
